PulsaClean® / PulsaClean® AC

PulsaClean® is an effective and easy-to-use disposable Pulse Lavage System for an intense wound debridement of bone and tissue defects. With its two nozzles for knee and hip arthroplasties as well as its rinsing and sucking mechanism PulsaClean® allows an optimal treatment flexibility for the user without any additional logistic effort.

Intended use

The PulsaClean® Pulse Lavage System is indicated for pulsatile lavage and removal of debris from operative area e.g. for the use during

- debridement of a wound site through irrigation and suction
- preparation of a bone bed for hip or knee arthroplasties

This device is used together with normal sterile saline or other applicable solutions. A suction machine is optional.

PulsaClean® Disposable Pulse Lavage at a glance

PulsaClean® LD 1000 (with batteries)

PulsaClean® AC LD 1500 and Adapter LD 1510

- **More power**
Unlimited irrigation volume and non-diminishing power output.
- **No battery waste**
The re-usable AC adapter allows the riddance of any alkaline batteries and is an environmentally friendly option.

Easy and safe application by nozzle fixation with one »click«

The PulsaClean® handpiece contains a special attachment mechanism which is complementary to the nozzles. The different diametric openings inhibit a wrong fixation of the nozzles and prevent from the mixing of the rinsing and sucking tubes.

Additional accessories

Short nozzle with splash shield for knee TEP and other debridement LD 1020

- Easy to use
- User friendly click mechanism for safe fixation of the nozzle

Femoral canal brush LD 1010

Additionally to the PulsaClean® Disposable Lavage System with each a short and a long nozzle, a femoral canal brush is available. The short and strong bristles allow an intense cleaning deep into the marrow canal. Analogously to the nozzles the canal brush provides a rinsing and sucking function, too.

Benefits

LD 1000 & LD 1500

- One system with added short and long nozzles for different indication fields results into minimized logistic effort
- Latex free product
- User friendly click mechanism for safe fixation of the nozzles
- Two flow stages with flow rate > 0.9 L/min (long nozzle) and > 1.0 L/min (short nozzle)
- Intense but gently cleaning due to fog-like irrigation pressure of > 15 psi
- User friendly noise level with < 75 dB(A)
- Ergonomic designed handpiece with about 3 m integrated rinsing and sucking tubes allows comfortable usage for the surgeon
- High patient safety due to special clamps that prevent backflow of rinsing solution

LD 1000

- Powered by 10 pieces of DC 1.5 V mercury-free AA alkaline batteries (Power voltage: DC 15 V, power rating: 37.5 W)
- Lightweight handpiece with < 0.13 kg due to external battery pack (Net weight disposable lavage < 0.8 kg)
- Easy suspension device for battery pack

LD 1500

- Lightweight handpiece with < 0.13 kg
- Unlimited irrigation volume and non-diminishing power output
- Environmentally friendly option due to the absence of disposable batteries
